

TRUSTED BUSINESS GROWTH PARTNER

CASE STUDY ON
EZ STREET ASPHALT

AUSTRALIA

CASE STUDY

Introduction

EZ Street was founded in Miami, Florida in 1995 by brothers Lars and Dag Seagren. They identified that maintenance on state roads was extremely inefficient with the accessibility problems of hot mix and the performance problems of cold mix. They decided that by applying permanent properties to cold asphalt, State roads departments could in many cases eliminate the process of laying temporary cold patches and subsequent costly follow up reinstatement with hot asphalt.

And so began EZ Street. Twelve years on and with State departments using this industry changing blend, EZ Street took the journey down under. The brand is operated in Australia in collaboration with our very own Aussie civil contracting company –

READY TO USE

Now used by Councils from the far Northern Aboriginal shires of Queensland, Main Roads, the Road Traffic Authority and VICERoads of the east coast, right the way over to a huge chunk of WA councils and back up to the Northern Territory, EZ Street has left its permanent imprint all over this great southern land.

THE CHALLENGE

Gaining Brand Awareness, Visibility, and Generating a Consistent Stream of Quality Leads

Before the COVID-19 crisis started in Australia, EZ Street Asphalt used to heavily rely on word-of-mouth, and traditional offline marketing channels, such as trade shows and expos.

Since COVID-19, their sources of enquiries plummeted as they are unable to fall back on the usual sources of enquiries.

EZ Street's internal team kicked off the online marketing campaign in early 2021 but the team had no prior know-how on online marketing and were struggling with attracting enquiries.

The ads were not converting, there were no concrete online marketing strategies in place.

Despite them having a product that is incredibly effective for the Australian market, with an immense potential to revolutionise road repairs and the fact that they are backed-up by the trusted Fulton Hogan brand, the brand was struggling to recover their sales volume.

Fulton Hogan needed a trusted team who could give direction to their branding and online marketing, who could properly maximise their marketing channels with well put-together strategies. Their revolutionary products needed to be heard, seen and trusted by their target audience.

THE SOLUTION

Our focus was mainly on amplifying their online presence, taking their to increase their enquiries

Through our unique discovery and development sessions, as well as extensive research, we began working alongside EZ Street team to put together a strong online presence for this high-potential company.

Using avenues like SEO, Google Ads, LinkedIn, offline marketing, LinkedIn profile management, we started boosting their online visibility. It was evident from both the number and the context of the enquiries that their target audience were starting to notice the product, the benefits and wanted to know more or order straight away.

The drastic improvement in their Google ranking also has been providing a strong turf to compete against with other similar companies.

From online to offline reputation management and lead generation, it was all done for them through our Done 4U Marketing Solutions.

"I'm thrilled to see the number of our leads doubled up in just 3 months of working with VIS. Our sales record has exploded, we sold more products this last quarter than the whole other months combined this financial year. The VIS team is a delight to work with, easy to reach, they know their stuff and are ready to help in every possible way.

Can't recommend them highly enough!"

Ivanka Barritt
National BDM - EZ Street

THE RESULT

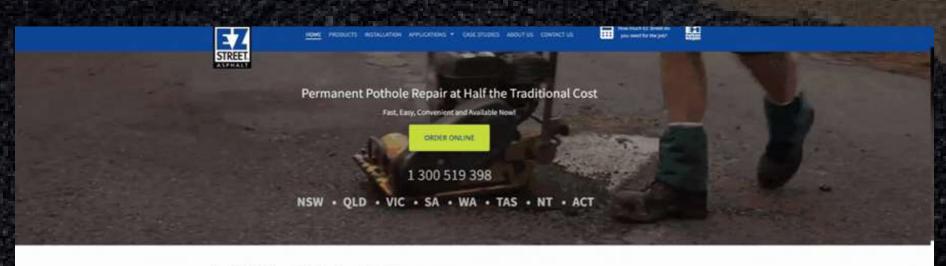

We began the project with a strong goal to generate quality leads, brand awareness and genuine enquiries.

With a greater online presence and continued digital marketing, EZ Street continues to grow as an innovative road repair solution company
